Special Events at the Main Tent

Friday Night

Lon Myers brings his years of leading walks and enthusiasm for nature to the Big Tent. Join us for an entertaining combination of photography, hands on activities, and game show atmosphere, presented by our own Lon Myers. You may have been on his "Adult Only" walks but this one will surely entertain the whole family!

Saturday Night

Meet Steve Daniel, another veteran naturalist who has led ecotours for over 20 years to beautiful places including most of our national parks. Enjoy his personal tour of "Cool Bugs and Nature." How cool is a ten foot bug on our big screen?

Go to www.alleganynaturepilgrimage.com for more info on tent programs

Field Trips & Programs

There are a lot of trips, walks and talks through the weekend. Each trip is led by a teacher, professor, PhD, expert or someone sharing their lifelong passion. All trips begin at Camp Allegany. Here is a list of possible activities:

Birding:

Dawn and Dusk Bird Walks: Go on an informal walk with birders to see what's happening during peak birding times.

Bird Banding: See how scientists capture and put metal bracelets on birds to study them.

Beginning Birding: Learn how to use a field guide and binoculars . . . and what to look for when purchasing them.

Advanced Birding: Look for harder to find birds and identify them by sight and sound.

Also Look For: Birding by Ear, Bluebirds, Maintenance Road Bird Walks, and more!

Insects:

Butterflies: Look for and catch some of the butterflies of the park. Learn how to identify them and their habits.

Pond Life: Discover the underwater monsters of the insect world. Many insects start out as strange looking critters underwater.

Insects: Take nets out and discover the amazing kinds of insects that can be found in the park.

Dragonflies: See these beauties up close and personal!

Animals:

Animal Tracking: Learn how to find the scat and signs of local mammals.

Beavers: Go out and search for the local beavers and learn about their lives.

Bring your lawn chairs and enjoy NAN HOFFMAN 5:30 pm Saturday

ALL FIELD TRIPS ARE SUBJECT TO CHANGE

CHECK OUT OUR SALES ITEMS

Weekend volunteers & new committee members always Welcomed.

Always 1st weekend after Memorial Day!

Herpetology:

Look at snakes and other reptiles, then go on a salamander hunt.

Plants:

Plant Exhibit:

Get a look at some of the most incredible plants in our area. This photo exhibit stays up through out the weekend

Wildflowers: Learn how to identify some of the spring wildflowers in the park. Beginning or advanced.

Edible Plants: Hunt down plants that taste great and learn what to eat in the woods.

Ferns: Learn how to identify local ferns.

Primeval Forest: Hike into the old growth areas of the park and learn what constitutes an Old Grown Forest.

Trees: Learn how to identify local trees and shrubs.

Forest Ecology: A forest is more than trees, it is an interconnected web of soil, animals, plants and more. Find out how it works.

Other Nature Programs:

Night Walks: Go on owl prowls or hunt for bats. Watch the stars or the insects of the night, weather dependent.

5-mile Hike: Go for a five mile hike through some of the parks most scenic areas.

Wilderness Survival: Learn how to survive in the wilderness by making fire and shelter.

Papermaking: Learn how to make paper from natural materials.

Off-trail Hike: Get off the regular trails and wander through the woods where few folks go.

Park History: Learn the human history behind this incredible natural area.

Geology: The park is one of the only places in the state that did not get plowed over by a glacier in the last ice age. Discover the unique geology, fossils and formations common to this region.

Green Yoga: How else to relax but outside.

Nature Photography: Improve your skills.

Nature Painting: Watercolors or pastels.

Bird Banding with Bob
